

# PROLINNOVA

**PROMoting Local INNOVation**  
in ecologically-oriented agriculture and natural resource management

Towards institutionalization of  
**Participatory Innovation Development (PID)**

## What do we mean?

- Institutionalise/mainstream PID and other participatory approaches that build on local innovation into research, extension and education institutions

**PROLINNOVA**  
PROMoting Local INNOVation  
in ecologically-oriented agriculture and natural resource management

## This call for...

- Integration of concepts of LI and PID.
- Share, interact and promote good practices of LI.
- Forge strategic alliances.
- Influence so that LI and PID receive greater understanding and acceptance.
- Gather evidence to influence policy.
- Etc.

## Questions

- Where are we?
- Looking to countries that have tried to move in the direction of institutionalisation, what lessons can we draw from existing experiences?
- Reflexion on these experiences and referring to our own experiences,
  - A) What does work/what does not work in the process of institutionalisation?
  - B) If we engage in the next 5 years, in which areas to focus, which roles to be defined, what methods/tools are more effective to achieve institutional change?
