

Vision: A world where women and men farmers play decisive roles in ARD for sustainable livelihoods

In several countries in Africa, Asia and Latin America, diverse organisations have joined forces to promote local innovation processes in agriculture and natural resource management (NRM). After analysing their own experiences in agricultural research and development (ARD), they formed Country/Regional Platforms (CPs/RPs), designed their own programmes and agreed on joint international activities for mutual learning and policy dialogue. This Global Partnership Programme (GPP) is a community of practice that is built from the bottom up, in the spirit of the Global Forum on Agricultural Research (GFAR).

PROLINNOVA is an NGO-initiated international multistakeholder platform to promote local innovation processes in ecologically oriented agriculture and NRM. It focuses on recognising the **dynamics** of indigenous knowledge (IK) and enhancing capacities of farmers (including pastoralists, forest dwellers and fisherfolk) to adjust to change – to develop their own site-appropriate systems and institutions of resource management so as to gain food security, sustain their livelihoods and safeguard the environment. The essence of sustainability lies in the capacity to adapt.

The network builds on and scales up farmer-led approaches to participatory development that start with finding out how farmers create new and better ways of doing things. Understanding the rationale behind local innovation transforms how research and extension agents view local people. This experience stimulates interest on both sides to enter into joint action. Local ideas are further developed in a process that integrates IK and scientific knowledge. Joint action and analysis lead to joint learning.

How it all started

PROLINNOVA was conceived in late 1999, when Southern and Northern NGOs – supported by GFAR, the CGIAR NGO Committee (NGOC) and the French Ministry of Foreign Affairs – met in France to explore how participatory approaches to ARD based on local initiatives could be scaled up. Participants asked ETC, a Netherlands-based NGO, to help launch a GPP built up from country level. NGOs in Africa and Asia facilitated multistakeholder design of country platforms (CPs). They developed country-specific ways to:

- document local innovation and experimentation by smallholder farmers and communities;
- strengthen links between farmers, development agents, scientists and other actors to refine local innovations and encourage others to try them out;
- create awareness of and skills in participatory innovation development (PID) through a variety of learning mechanisms;
- develop and expand mechanisms that give farmers more influence over formal research & extension;
- institutionalise PID approaches in research, development and education.

PROLINNOVA seeks to:

- demonstrate the effectiveness of farmer-led participatory innovation for sustainable development
- build partnerships in agricultural innovation
- enhance capacities of farmers, researchers and extension agents in participatory approaches
- facilitate decentralised funding mechanisms to promote local innovation
- engage in national and regional policy dialogue to stimulate and enhance local innovation processes
- set up platforms for reflection, analysis and learning about promoting local innovation processes
- integrate participatory approaches to farmer-led innovation into institutions of research, extension and learning.

Participatory design of the GPP

Starting in 2003, organisations engaged in ARD in Ethiopia, Ghana and Uganda – supported by IFAD (International Fund for Agricultural Development) – collected in-country experiences in recognising local innovation and promoting PID. They held workshops to analyse their experiences and developed plans to scale up PID. From 2004, DGIS (Dutch Directorate General for International Cooperation) partly funded the three CPs to realise their plans and supported similar processes in Cambodia, Nepal, Niger, South Africa, Sudan and Tanzania.

In 2006, a francophone network PROFEIS expanded in West Africa to include Burkina Faso, Mali and Senegal. An Andes group started in Bolivia, Ecuador and Peru. In 2007–12, CPs in Cameroon, India, Kenya, Mozambique and Nigeria joined PROLINNOVA.

Activities differ between countries depending on their history, experience and self-identified capacities to recognise IK dynamics, engage in PID and scale it up. However, common elements include:

- developing inventories of local innovations, innovators and organisations working with them;
- bringing farmers, extensionists and scientists together to plan and implement joint experiments, starting from jointly prioritised local innovations;

- creating national and subnational multistakeholder platforms to learn jointly about local innovation and PID and its institutionalisation;
- building capacities to identify and document local innovation and to engage in PID, through training workshops for farmers, extensionists and scientists
- participatory monitoring and evaluation (PM&E) of joint activities, outcomes and impacts;
- creating awareness through innovator fairs, publications, mass media etc
- engaging in dialogue with policymakers in research, extension and education to create enabling conditions for PID.

At annual meetings since 2004, country-level partners define the international networking, learning and other support mechanisms needed to reinforce their work. Participatory planning at international level thus mirrors the approach at national and grassroots level: the partners develop their own programme based on self-defined needs and interests.

Structure of the decentralised network

In each country or region, normally a local NGO convenes the major ARD stakeholders. It serves as secretariat for a **National Steering Committee (NSC)** with people from government research, extension and education, other NGOs and farmer groups. The NSC defines the CP/RP activities, ranging from farmer-led research to policy dialogue; gives strategic guidance; helps mobilise resources; and is the apex structure for accountability. A smaller core team coordinates day-to-day implementation of the activities.

An **International Support Team (IST)** supports the national and regional activities through coordination, capacity strengthening, coaching, policy dialogue, web-based information management, networking and publishing. The IST comprises IIRR (Philippines), ETC Foundation (Netherlands) and IED–Afrique (Senegal).

The **PROLINNOVA Oversight Group (POG)** serves as governance mechanism to ensure accountability of the GPP to the CPs, their constituencies and donors.

PROLINNOVA Oversight Group (POG)

- **Amanuel Assefa**, Ethiopia (kidus_aman@yahoo.com)
- **Jean Bosco Etoa**, Cameroon (etoa_ngbwa@hotmail.com)
- **Julian Gonsalves**, India (juliangonsalves@yahoo.com)
- **Marise Espineli** (Co-chair), Philippines (marise.espineli@iirr.org)
- **Suman Manandhar**, Nepal (smanandhar@libird.org)
- **Scott Killough**, USA (scott4killough@gmail.com)
- **Sergio Larrea**, Ecuador (slarream@yahoo.com)
- **Susan Kaaria** (Co-chair), Kenya (susan.kaaria@fao.org)

The POG is made up of four people from CPs, one from the IST and three independent persons, elected by the CPs and the IST to serve 2-year terms. The POG meets face-to-face at least once a year and communicates otherwise by email and Skype. It has

drawn up several guidelines for the GPP, to be found under www.prolinnova.net/content/prolinnova-guidelines.

Participatory learning and mentoring

In 2004, the first **International Partners Workshop (IPW)** was hosted by AgriService Ethiopia (ASE) / PROLINNOVA–Ethiopia. Local farmers explained how their innovations helped them achieve food security. Government and NGO participants from each CP shared experiences in farmer–extension–research–education partnerships and planned joint activities.

In 2005, the IPW was hosted by Environmental Alert / PROLINNOVA–Uganda prior to the FARA (Forum on Agricultural Research in Africa) General Assembly, so that PROLINNOVA partners could join the pre-plenary meeting to set up an NGO ARD consortium in Africa.

Since then, IPW hosts have been:

- 2006 CEDAC, PROLINNOVA–Cambodia;
- 2007 IED–Afrique, PROFEIS, Senegal;
- 2008 ACDEP, PROLINNOVA–North Ghana;
- 2009 LI-BIRD, PROLINNOVA–Nepal;
- 2010 ETC Netherlands (PROLINNOVA Secretariat);
- 2011 PELUM–Tz, PROLINNOVA–Tanzania;
- 2012 ADAF–Gallè, PROFEIS–Mali;
- 2013 KARI & World Neighbors, PROLINNOVA–Kenya.

Capacity strengthening is central to PROLINNOVA. IIRR gave **international training in PID facilitation** in the Philippines (2004), Uganda (2006), Ethiopia (2007) and Kenya (2009). The participants trained research and extension staff in their own countries. With Nuffic funds, ETC gave similar training in Kenya in 2013.

In 2006, PELUM–Tz gave an international **course on policy dialogue**. A mini-workshop on this was held at the 2007 IPW in Senegal. Further training in policy dialogue was given in 2009 in The Netherlands.

A **writeshop on gender issues** in PID, based on the principle of learning through joint documentation by CP partners, was held in 2008 in Uganda; plus sessions on gender during several IPWs.

Similar **writeshops on piloting Local Innovation Support Funds (LISFs)** were held in 2008 in Ghana and 2012 in Mali, prior to publishing documentation.

An **M&E** framework with guidelines for the global and local PROLINNOVA tracking of results was developed in 2006. An international workshop to learn from the M&E experiences was held in Ethiopia in 2010. With support from CIRAD (France), the CPs developed a **participatory impact assessment** guideline in 2010.

South–South mentoring and **cross-visits** between CPs enhance mutual learning and strengthen capacities to build partnerships in ARD. In 2012, African consultants facilitated a self-assessment of multistakeholder partnership experiences and lessons learnt in Kenya, Tanzania and Uganda.

Thematic initiatives

CPs with common interests in specific themes have joined forces in several initiatives:

- **Local Innovation Support Funds (LISFs).** Action research in Cambodia, Ethiopia, Ghana, Kenya, Nepal, South Africa, Tanzania and Uganda helped to develop mechanisms to channel ARD funds to farmer innovators, so they can lead joint experimentation and accelerate local innovation processes. After start-up support from DURAS (Promoting Sustainable Development in Agricultural Research Systems), co-funding was provided by Rockefeller Foundation through the Farmer Access to Innovation Resources (FAIR) project. The CPs are finding ways to integrate LISFs into existing institutions in their countries.
- **Farmer-led documentation (FLD).** PROLINNOVA, Insight and COMPAS (Comparing & Supporting Endogenous Development) piloted participatory video in Ghana to share local innovations and influence policy. In 2006, PELUM–Uganda, PROLINNOVA and Oxfam–Novib held an international FLD workshop in Uganda. FLD was facilitated in Burkina Faso, Ethiopia, Niger, South Africa and Sudan.
- **HIV/AIDS and PID (HAPID).** In 2008–11 PROLINNOVA–SA coordinated action research in Mozambique and South Africa to explore implications of HIV/AIDS for PID and possibilities of using the approach in work with communities confronting HIV/AIDS.
- **Integration into education.** To reinforce activities in several CPs to integrate PID into agricultural education, these CPs exchanged course designs and materials in 2009 at a workshop in Uganda.
- **PID and climate change.** In 2008–10, partners in Ethiopia, Nepal and Niger studied how farmers innovate to adapt to climate change. In 2012, an Asian initiative on this topic (LINEX-CCA) started with Misereor support in Cambodia, India and Nepal and PROLINNOVA became a partner of CCAFS (Climate Change, Agriculture and Food Security) to explore tools of social learning for climate change adaptation.
- **Community resilience.** In 2012, the CPs in eastern Africa initiated CLIC-SR (Combining Local Innovation Capacity with Scientific Research) to strengthen community resilience to change, with support from Rockefeller Foundation.

Networking, co-learning and policy dialogue

Working with **existing e-networks and databases**, PROLINNOVA shares concepts and experiences in participatory innovation. To bridge the digital divide, it also disseminates printed matter and seeks links with other media, e.g. radio. Information about PROLINNOVA activities is spread through magazines (e.g. *Farming Matters*, *Appropriate Technology*, *Rural Development News*), e-newsletters and Yammer.

The **PROLINNOVA website (www.prolinnova.net)** is the main tool for wider sharing. The PROLINNOVA e-group serves as an open platform about ARD that builds on and enhances local innovation processes.

Often with GFAR support, PROLINNOVA takes part in many international **ARD fora**. At the 2003 GFAR meeting in Kenya, ASE told how the CP was set up in Ethiopia. At GFAR 2004 in Mexico, Environmental Alert presented PROLINNOVA–Uganda. At the 2005 European Forum on ARD in Switzerland, LI-BIRD and Farmer Support Group presented their partnership experiences in Nepal and South Africa. The POG

chair reported on PROLINNOVA progress to GFAR 2005 in Morocco, and an IST member in 2006 in the USA. CEDAC presented the Asian experiences to APAARI (Asia Pacific Association of Agricultural Research Institutions) in 2006, and LI-BIRD to APAARI in 2007.

PROLINNOVA's experiences were shared at GCARD (Global Conference on Agricultural Research for Development) in France (2010) and Uruguay (2012) and at PAEPARD meetings in Europe in 2011 & 2012.

At FARA's 4th General Assembly (GA) in South Africa in 2007, PROLINNOVA–SA presented the GPP in an event organised by Research Into Use, which also funded smallholders to prepare posters, brochures and videos to showcase their innovations and attend the FARA GA. PROLINNOVA partners from Mali, Niger and the IST joined FARA's GA in Burkina Faso in 2010 and will do so again in 2013.

PROLINNOVA collaborated with international research centres (CIAT-Africa, IFPRI and ILRI) and IIRR to hold the **Innovation Africa Symposium** in 2006 in Uganda. In 2009, it co-organised with CIAT-Asia and CIMOD the **Innovation Asia-Pacific Symposium** in Nepal (see Resources on PROLINNOVA website).

Several PROLINNOVA partners joined the **Farmer First Revisited** conference in 2007 in the UK (www.farmer-first.org). The GPP was featured in the Innovation for Sustainable Development in Agriculture & Food (**ISDA**) symposium in June 2010 in France.

POG Co-Chair Scott Killough attended the 1st meeting of the **Global Forum on Rural Advisory Services (GFRAS)** in Chile in 2010. IST members attended the 2nd GFRAS meeting (2011) in Kenya and the 3rd one (2012) in the Philippines.

In early 2012, experiences with LISFs were presented at the World Bank's Agricultural Innovation Systems workshop in Washington DC, Coady International Institute (Canada) and McKnight Foundation's Collaborative Crop Research Program (USA).

PROLINNOVA collaborates with the EU-funded projects **Including Smallholders in ARD (INSARD)**, led by ETC Foundation and focused on Africa, and **Joint Learning in Innovation Systems in African Agriculture (JOLISAA)**, led by CIRAD with partners in Benin, Kenya and South Africa. This joined forces with CCAFS, AusAID and many other organisations in organising a Week on Agricultural Innovation in Africa in May 2013. This involved various events including the Eastern African Farmer Innovation Fair and the international workshop on Agricultural Innovation Systems in Africa (see aisa2013.wikispaces.com).

Sources of support

After inception funding from IFAD, DGIS was the main donor. GFAR, CTA, French Ministry of Foreign Affairs, Rockefeller and Ford Foundations, ActionAid, EED (Church Development Service), Misereor, RIU, World Bank and CCAFS have supported specific activities.

The partners in the IST and CPs cover over one third of total costs themselves. Funds are still sought for national multistakeholder platforms, new thematic initiatives and core networking activities.

Some PROLINNOVA publications and papers

- *Developing technology with farmers: a trainer's guide for participatory learning*. ZED Books, London, 1997 / reprint IIRR, Silang, 2004 (also in Spanish & Arabic)
- *Farmer innovation in Africa: a source of inspiration for agricultural development*. Earthscan, London, 2001.
